**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on December 23, 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

**Entry of Amendment**

1. Applicant's amendment, filed on December 23, 2000, as paper No. 8, is acknowledged. Claims 2-7, 9-12, and 15-24 are currently pending.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

-Claims 2-4, 6, 7, 9-12, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Acker et al. (US 6,128,522).

Acker teaches a magnetic navigation system that moves a device to a predetermined position, including an automatically guided transported system, (Column 9, lines 1-10) comprising the following structures:

- Nuclear spin tomograph, an image-generating device to help with treatment guidance. (Column 8, lines 33-50, column 10, lines 53-67 and column 11, lines 1-56)
- Control unit with inherent wire control for signal communication, as claimed in 7. (Column 15, lines 22-41)

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

-Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Acker et al. (US 6,128,522).

Acker meets all the claims except that it fails to teach MR coils with flux density of .5 Tesla. However, it would have been an obvious design choice to one having ordinary skill in the art at the time the invention was made to set the flux density at such a level in order to optimize image quality.

-Claims 3 and 17 rejected under 35 U.S.C. 103(a) as being unpatentable over Lemelson (US 5,865,744).

Lemelson teaches a catheter guidance device using laser navigation system that automatically guides a therapeutic device, (Column 7, lines 45-67 and column 8, lines 1-67) and further comprising a laser range-finding device to measure the path of catheter. (Column 8, lines 60-67) while it fails to teach a laser imager with a reflector, it is well known in the art of laser imaging and guidance to one having ordinary skill in the art at the time the invention was made that reflector are used in laser range finding to direct laser to the subject, as well as directing reflected signals to be processed.

***Allowable Subject Matter***

4. Claims 15, 16, 18-21, 23, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to claims 2-7, 9-12, and 15-24 have been considered but are moot in view of the new ground(s) of rejection.

The examiner notes that the limitations independent claims have been broadened in the applicant's amendment such that they no longer embody the allowable subject matter that are now claimed by the allowable claims 15, 16, 18-21, 23, and 24 above.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3737

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
